

# BRIMLIT™

## LED Hat Light

Hands-free illumination, flexible construction, and versatile design—our BrimLit is a literal hat trick.

Flexible and lightweight, the Nite Ize BrimLit is a convenient, LED-powered hands-free light that clips easily and securely onto nearly any hat, cap, or visor brim. Formed from high-density EVA foam, the BrimLit slides underneath your hat's brim and easily accommodates its shape. Its two spring-tension clips automatically adjust to the brim's thickness, and a quick press of the button activates the BrimLit's four LED bulbs—choose high mode for more directed light or low mode for glow. Perfect for illuminating outdoor nighttime/early morning tasks around the campsite, in garage, hunting or fishing while keeping your hands free, as well as hard-to-reach jobs under cabinets and in a tight crawl space. Powered by two fully replaceable lithium batteries (included).
