

# CLIP-ON MARKER™

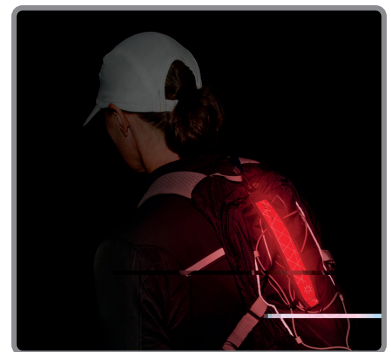

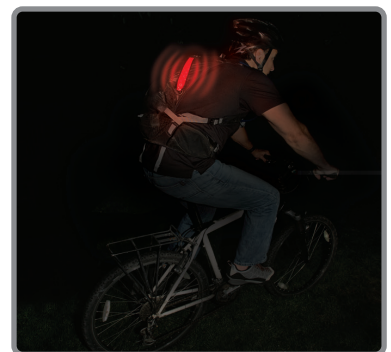

Be Seen | Be Safe

With a durable plastic clip that's easy to attach, remove, and reattach, our new, streamlined LED Clip-On Marker™ has as many uses as there are rings, loops and buckles in the world.

Here's a handy way to create flexible, two-sided illumination almost anywhere, over and over and over again. An ecologically responsible alternative to disposable chemical glow sticks, the Nite Ize LED Clip-On Marker is a flexible polymer strip encased in lightweight, durable nylon fabric. Decorated with a reflective pattern for extra visibility, the Clip-On Marker is illuminated on both sides by an efficient (over 100,000 hour) LED bulb and powered by a 2032 replaceable battery (included). Lightweight, thin, and weather-resistant, its sturdy plastic S-Biner Clip can be attached to almost anything with a hook or ring—from zippers and tent lines to belt loops and bicycle seats. It has a D-ring on the opposite end, too, so you can also clip it to itself and create a loop of light to wear on your wrist, or wrap around anything up to 3" in diameter. The bright red LED has two modes to choose from—steady glow or continuous flash. Perfect for creating safety visibility in any situation—every glove box should have one!

- ⊕ Bright Red LED Illumination – Glow or Flash
- ⊕ Lightweight, flexible design
- ⊕ Passive High Visibility Reflective Pattern
- ⊕ Easily replaceable battery included (1 x 2032 3V Lithium)
- ⊕ 100 hour battery life
- ⊕ Product Dimensions: 10" x 1.4" x 0.2"  
Weight: 1.2 oz
