## Reflective Cord

## Reflective Cord Pack

The only thing more important than "knowing the ropes" is being able to see where they are, even in the dark. Introducing Reflective Cord: 50 beautiful, visible feet of it.

When you're out in the elements at night there are enough hazards to navigate without worrying about losing sight of what you've got tied down. The Reflective Cord comes in 50' (15.24 meters) length, and is perfect for things like tent guy lines, hanging bear bags, boating, tying up tarps or shelters, and then being able to see where it is when you're done. Made of sturdy nylon with a special reflective strip woven into it that reflect brightly when light is shined onto it, the Reflective Cord increases safety for you and the people around you on the trail, campsite, water, and highway.

$\oplus$ Package contains 50' (15.24 meters) of 2.44 mm green reflective cord
